

S.M.Y. TAMBORA

Tambora has been designed and built from scratch as a liveaboard vessel catering to the needs of divers. She offers great comfort and flair, and at the same time is optimally geared towards supporting a diving operation in terms of safety, convenience, and efficiency.

A large room on the upper deck has been custom-built and outfitted as a full dive station, divided up into two separate sections: the wet and the dry section which provides a safe place to open your camera, dive light or computer.

Tambora cruise program offers all the most better know dives places in Indonesia plus other new destinations, discovered during the 15 years Indonesian diving experiences of its Swiss owner Uwe.

CARATTERISTICHE TECNICHE :
